

The mission of Centro Jovellanos is to implement, develop and design comprehensive rescue and maritime safety training systems that are high quality, highly specialised, certified, innovative, and sustainable to ensure the most remarkable levels of professional training.

Train, provide, reduce, innovate and guarantee are the five key goals of the Jovellanos Centre, which is the training centre of the Spanish Maritime Search and Rescue Agency, a public entity dependent on the Ministry of Transport, Mobility and Urban Affairs.

- TRAIN: Understand the needs of professionals and propose efficient solutions to act in emergencies.
- PROVIDE: The necessary knowledge to implement tasks successfully at the workplace.
- REDUCE: Reduce fatalities and damage to the environment through training, thus avoiding risks and accidents.
- INNOVATE: Develop comprehensive virtual reality training methods that improve knowledge.
- ENSURE: The implementation of our quality system when designing and developing our training activities.

COURSE

FUTHER OFFSHORE EMERGENCY TRAINING FOET OPITO STANDARD 5858

TARGET GROUP

This course has been designed for people who work on offshore oil and gas facilities. The programme has been designed to renew and maintain their initial training requirements regarding safety and the capacity to respond in the event of emergency situations.

Requirement: All People taking this course must have the appropriate psychological and physical conditions to complete the training.

Trainees shall provide:

- an official medical certificate in force (e.g. certificate of fitness to sail, professional diving certificate, private official medical certificate, company medical certificate).
- a certificate in force recognized by OPITO (Offshore Petroleum Industry Training Organisation), of BOSIET, TBOSIET, FOET or TFOET

TRAINING

Objective: The purpose of the FOET course is to provide students with the chance to practice and demonstrate their emergency response skills that cannot be practiced during drills, exercises, and emergencies as sea.

The course includes a theoretical part, demonstrations by the instructors, and practical exercises that trainees must perform in order to achieve the goals set out.

All the practical training will be performed in a safe and controlled environment supervised by qualified instructors.

DURATION

The course consists of 8 certified hours, it's delivered over a period of 1 day.
